

# FINGERPICK

THE ORIGINAL BLUETOOTH BUTTON

FC CE

The new release of Finger Pick, the bluetooth finger button that allows you to wear the PDA on the wrist, keeping both hands free. With a simple push of the thumb, the integrated terminal scanner is activated to read any type of 1D and 2D code.

The latest handheld computers are exceptional tools for mobile data collection and management. They are light, rugged and built with a large display. They are also equipped with a very powerful barcode reader, giving the possibility to read barcodes in any case of use. Thanks to Finger Pick it is possible to use the handheld integrated reader without having to purchase external ring scanners.

## PERFECT FOR E-COMMERCE MANAGEMENT

Shopping from home is an increasingly common habit in families. Through a dedicated website, the retailer offers customers many products to choose from. Once the order has been received, the shop prepares the trolley which can be picked up after a few hours. The collection of the items is manual and is often done in the store itself; the employees receive the order on the PDA and, as for self-scanning, they read article by article. Having the hands free in these operations is essential to increase picking speed and accuracy. Two LEDs, one red and one blue, give respectively the level of the battery and connection status

### FINGER PICK Features

- **Free fingers:** putting your hands between boxes, shelves and drawers has never been easier and safer.
- **Simple and reliable:** Finger Pick is light and compact. Its elastic band is adjustable, replaceable and washable.
- **Bluetooth connection:** the connection with the PDA is completely wireless, thanks to Bluetooth LE technology.
- **Automatic pairing:** the integrated NFC module allows immediate pairing. Just put the button near the back of the terminal and you're done!
- **Software:** compliant with several Android mobile computers
- **Certification:** CE/FCC; Dome switch certified for a lifetime of millions of clicks

### TECHNICAL SPECIFICATIONS

- **Weight:** 22 grams (with battery)
- **Battery:** rechargeable lithium with magnetic usb type-c cable, life from 1 to 3 months, charging time 30 minutes
- **Radio:** bluetooth to transmit data and NFC for pairing with several PDA
- **Warranty:** 12 months

#### BATTERY RECHARGEABLE LAST MONTHS

The battery of the Finger Pick is the practical rechargeable lithium that, with its typical button shape, it is small and light. It can last up to 3 months and when discharged you can quickly simple rechargeable it via magnetic usb type c cable.

#### ERGONOMIC, LIGHT AND RESISTANT

Finger Pick weighs just 22 grams with a thickness of just over a centimeter, but very rugged because built using screws to fix each part. The button is easy to put on thanks to an elastic band that fits perfectly on the finger. The key is pressed with the thumb which is in a natural and relaxed position.

#### ANDROID APPLICATION

The first connection between the PDA handheld and Finger Pick is via NFC wireless technology. Subsequently, it is with Bluetooth that the barcode reader is activated each time the button is pressed. The data is thus sent on the display in keyboard emulation. All this thanks to the certified software that is installed on the handheld.
