SOTI SNAP

GET IT DONE. IN A SNAP.

RAPIDLY CREATE MOBILE APPS THAT DIGITIZE BUSINESS PROCESSES AND BOOST PRODUCTIVITY

SOTI Snap is a cross-platform solution that enables organizations to rapidly build mobile apps to replace paper-based processes by using the data-capturing capabilities of mobile devices.

With manual processes, organizations run the risk of collecting and acting on information that is incomplete or incorrectly recorded. Stakeholders can be missed and vital steps can be skipped. This leads to customer dissatisfaction, compliance issues, lost business or even legal fines and penalties.

With SOTI Snap, you can easily digitize data collection and approval processes to make them fast and efficient, allowing your business to save time and optimize its mobile device investment.

RAPID DIGITIZATION

Drag and drop widgets onto an intuitive, device-shaped canvas to prototype and iterate. Expedite the transition from paper to digital.

CENTRALIZE & STREAMLINE

Standardize manual business processes by connecting workflow-automated tasks. Reduce errors and improve transparency and accountability while increasing efficiencies.

CREATE CROSS-PLATFORM MOBILE APPS

Create cross-platform mobile apps for Apple iOS and Google Android devices. Reduce time to market by pushing mobile apps to devices instantly.

THE CHALLENGE WITH MANUAL PROCESSES

DATA COLLECTION: Human error and recording data manually is time-consuming and can lead to data being missed or incorrectly recorded. Manual records also make it difficult to search for and receive accurate real-time insights into business operations.

MANUAL APPROVALS: Unless recorded and shared manually, verbal approvals are not documented or referable, leading to inaccurate records and slowing down operations. With inbox volumes increasing, email approval requests end up buried and lead to a long list of manual follow ups and complex records of communication.

WHAT CAN SOTI SNAP DO FOR YOUR BUSINESS?

INCREASE OPERATIONAL EFFICIENCY

- Capture feedback through various forms and collect signatures electronically.
- Create customized workflows to streamline approvals and enhance user productivity.
- Automatically receive reports through email on a customized schedule to efficiently track data and records.
- Ensure mobile apps are always functional, even when there is intermittent Internet connectivity, to maintain productivity.
- Create UX-rich electronic forms and surveys within minutes.

IMPROVE EMPLOYEE AND CUSTOMER EXPERIENCE

- Capture data with your device by scanning barcodes, taking photos, scanning NFC tags, recording audio and capturing geolocation coordinates.
- Automatically import data into mobile apps from files and cloud applications.
- Train mobile workers remotely and present information by building mobile apps with embedded webpages, images and video.
- Easily add enhanced features to mobile apps with Blockly without the need for traditional coding.

Get the most out of your devices and streamline your mobile processes with the SOTI ONE Platform to meet the ever-changing needs of your business.

The SOTI ONE Platform provides full visibility, control and optimization of your critical mobile hardware and software, strengthening your mobile device strategy.

STREAMLINE YOUR APPROVAL PROCESSES

SAVE TIME WITH SOTI SNAP WORKFLOW

- Create mobile apps with mapped out approval workflows.
- Dynamically select approvers to expedite the approval process.
- Approvers can act on pending requests from any Internet-connected, browsing-capable device.

SOTI ONE PLATFORM INTEGRATION

SOTI MOBICONTROL
Track, manage and secure your mobile devices from unboxing to retirement with SOTI MobiControl.

SOTI XSIGHT
Fix mobile device problems faster and use analytics-based insights to make proactive, data-driven decisions.

SOTI IDENTITY
Single sign-on (SSO) support through SOTI Identity.

SOTI PULSE
Interact with a community of product experts, partners and customers to get answers to all your SOTI product questions with SOTI Pulse.

EASILY BUILD YOUR MOBILE APP

Every SOTI Snap app is built with widgets that add different capabilities to your mobile app to rapidly digitize your manual processes. Simply drag and drop widgets onto your app canvas to add functionalities that boost productivity.
