

StayLinked SmartBrowser

StayLinked SmartBrowser is purpose-built to deliver reliable performance, intuitive management, and robust security in mission-critical industrial environments. With effortless deployment, precise session control, and dynamic user experience capabilities, SmartBrowser ensures maximum productivity and streamlined workflows in the most demanding environments.

SmartBrowser Key Features

Enterprise Reliable Performance

Designed to deliver consistent, dependable performance with minimal latency, maximum uptime, and optimized efficiency.

Session Management

Securely manage user sessions, proactively block risky applications, enforce access policies, and ensure a controlled browsing environment.

Rapid Configuration and Deployment

Simplify and accelerate initial setup, seamless integration, and ongoing management for quick deployment across your organization.

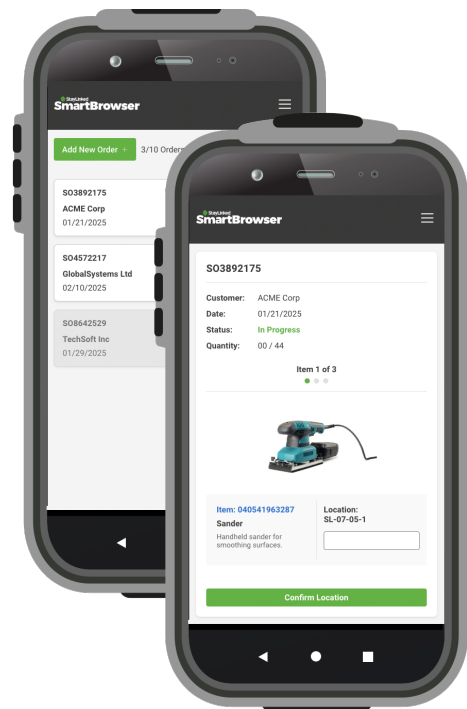

Superior User Experience

Enhance user productivity by easily modifying web applications in real-time through dynamic DOM injection, improving usability.

Integrated Demo

Personalize the integrated warehouse workflow demo experience to showcase tailored scenarios, fully functional even when offline.
